Lowering Aid for Baby & Child Small Coffins & Casket

Bio-degradable made from natural material.

LOWER WITH CONFIDENCE AND SAFETY IN A DIGNIFIED MANNER

Avoids slippage of standard lowering straps.

Eliminates potential family distress. Most baby or child coffins or ashes caskets / urns do not come with handles.

Lowering can often be precarious. This aid offers a safe and dignified lowering option. Because the pad is left in the grave it helps comfort the parents that their late child has not been laid onto bare earth.

Our cemetery approved and designed baby & child lowering pads can be used with most types of coffins and caskets.
